MONTH IN REVIEW
August 1993

Civilian Labor Force

The state unemployment rate increased to 7.5 percent in August from 7.4 percent in July 1993 with employment decreasing and unemployment virtually unchanged. The New York City unemployment rate held steady at 9.5 percent in August, the same as in July. In August 1992, the state unemployment rate was 8.2 percent and the New York City unemployment rate stood at 11.1 percent.

The nation's unemployment rate decreased significantly in August, falling to 6.5 percent from 6.9 percent in July. The nation's unemployment rate was at its lowest level since October 1991 when the rate was 6.4 percent.

Unemployment in the state was little changed over the month at 645,000 in August. In August 1993, about 57,000 fewer persons were unemployed than in August 1992.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) in New York State declined 12,400 from July 1993 to 7,675,400 in August. Public sector job losses (-18,000), principally seasonal cutbacks by local school districts, with lesser declines in finance, insurance and real estate (-1,300), trade (-700) and transportation and public utilities (-300) were tempered by employment gains in manufacturing (+ 3,600), construction (+ 2,600), and services (+ 1,700). Mining employment was unchanged from July.

A securities firm's move to New Jersey accounted for almost 70 percent of the drop in finance, insurance and real estate employment. The division's job level was further depressed by cutbacks in the insurance portion. Hires in the real estate industry softened these losses.

A 1,600 job loss in wholesale trade, mostly in durable goods, was tempered by modest employment gains at apparel stores and eating establishments in the retail sector.

The transportation and public utilities group reported little change in employment in August. Drops in electric and gas utilities and local transit jobs were softened by an increase in the trucking and warehousing division.

The increase in manufacturing employment over the month occurred in nondurable goods, spearheaded by job gains in the apparel industry. The job level increased slightly among other nondurable goods industries except for minor losses in the chemical, and rubber and plastic industries.

Hiring by special trade contractors accounted for most of the August upturn in construction jobs. Heavy construction hiring was unchanged, while general building contractor employment showed a slight gain.

Increased employment levels at business services, hotels, amusement and recreation services, motion pictures, and health services were dampened by seasonal job losses in educational services as well as declines in most of the remaining services industries.

Compared with a year ago, nonfarm employment in New York State was down 48,500 or -0.6 percent. Manufacturing employment was off 43,600 (-4.3 percent), public employment dropped 17,400 (-1.2 percent), trade declined 10,300 (-0.7 percent), transportation and public utilities decreased 8,900 (-2.2 percent), finance, insurance and real estate was down 6,600 (-0.9 percent) and construction was off 2,800 (-1.1 percent). Services posted a 41,300 (+ 1.8 percent) gain while mining sector employment remained unchanged.

INSURED EMPLOYMENT AND PAYROLLS
FOURTH QUARTER 1992

INSURED COVERAGE. Under the New York State Unemployment Insurance Law as a result of an amendment effective January 1960, an employer of individuals other than household workers becomes liable for the unemployment insurance tax if within a single calendar quarter he pays remuneration of $300 or more. As a result of an amendment effective January 1966, an employer who employs one or more household workers and pays them cash remuneration of $500 or more within a single calendar quarter becomes liable for the tax. In effect, employers of one or more workers become liable for the unemployment insurance tax on the first day of the calendar quarter in which remuneration is paid.

Most persons employed by nonprofit organizations were covered by unemployment insurance beginning January 1, 1971 as a result of "stand-by" legislation originally enacted in 1965 which became operative because of the federal amendments of 1970.

A nonprofit organization becomes liable when it makes cash payments to its employees of $1,000 or more in a calendar quarter. Effective January 1, 1972, liability also begins if the nonprofit organization employs four or more persons on each of 20 days in at least 20 different weeks during the current or preceding calendar year.

Effective January 1, 1978, the services of persons engaged in a teaching or other professional capacity at a nonprofit educational institution below the college level were covered by unemployment insurance.

Agricultural labor was also covered as of January 1, 1978. Exceptions exist for employers of fewer than 10 persons or those with a quarterly payroll of less than $20,000.

Effective with first quarter 1985 data, employees of the federal government, New York State, and local government units covered for unemployment compensation purposes are included in this series.

Certain groups continue to be excluded from coverage. Those excluded are interstate railroads, the self-employed, services of an individual employer's wife, husband or minor child and certain other small groups of workers.

Insured employment data are not intended to reflect a continuous series over the years. The data only represent experience within a specific calendar period. Significant factors which affect comparability are changes in the coverage provisions of the law, such as those mentioned above, as well as employment reclassification changes. The reclassification changes are occasioned by industrial and/or geographic classification code changes. They may be economic or noneconomic. Economic code changes are made in the quarter when the product or business activity of an establishment has changes (industry code) or whenever an employer moves from one location to another in New York State (geographic code). Noneconomic code changes are made effective in the first quarter of each year. Noneconomic code changes arise from (1) structural changes in the *Standard Industrial Classification Manual*, and (2) newly disclosed information affecting either the industrial or geographic location.

REPORTING UNIT. An establishment, or reporting unit, is usually a single place of business, engaged in a single business activity, and operated by a single employer. Business firms operating more than one establishment, in which the sum of employment in secondary locations exceeds 10 persons, are required to submit a separate report for each unit unless the payrolls are not maintained separately. If two or more units of a single employer are in a single physical location but maintain separate payroll records and engage in distinct or separate business activities, then each unit is treated as a separate reporting unit.

EMPLOYMENT. The tables in this report include all employment covered under the New York State Unemployment Insurance Law for each of the three months in the quarter. The employment count represents the number of full-time and part-time employees earnings wages or salaries for the payroll period including the 12th of the month. Included are persons on paid vacations and on paid sick leave. Workers temporarily earning no wages because of labor-management disputes, layoffs or other reasons are not reported as employed. Persons on the payroll of more than one establishment during the same reference week are reported more than once.

TOTAL QUARTERLY PAYROLLS. Total quarterly payrolls cover all wages and salaries paid to individuals in insured employment.

INDUSTRIAL CLASSIFICATION. Data are classified in accordance with the 1987 edition of the *Standard Industrial Classification Manual* prepared by the U.S. Office of Management and Budget. This edition replaces the 1972 edition.

When a 2-digit manufacturing industry has less than 100 employees or less than three reporting units, figures are combined in "all other durable goods" or "all other nondurable goods."

The category "all other" includes agriculture, forestry and fisheries, mining and unclassified establishments.

COUNTY CLASSIFICATION. County classification of employment and payroll data is based on the physical location of the establishment. The category "statewide" which appears at the end of the county listing covers all reporting units not classified by county. Included in this category are: reporting units without a fixed location within the state, those with a significant number of employees in more than one county for which separate data are not available, and those for which county location has not yet been determined.

LABOR AREA. A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purpose of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and employment service program) is given below:

-- *Albany-Schenectady-Troy*. Albany, Montgomery, Greene, Rensselaer, Saratoga and Schenectady counties.
-- *Binghamton*. Broome and Tioga counties.
-- *Buffalo*. Erie and Niagara counties.
-- *Nassau-Suffolk*. Nassau and Suffolk counties.
-- *New York City*. Bronx, Kings, New York, Queens and Richmond counties.
-- *Rochester*. Livingston, Monroe, Ontario, Orleans and Wayne counties.
-- *Syracuse*. Madison, Onondaga and Oswego counties.
-- *Utica-Rome*. Herkimer and Oneida counties.
-- *Westchester*. Westchester County.

SOURCE OF DATA. Reports submitted quarterly by employers subject to the New York State Unemployment Insurance Law.

INSURED EMPLOYMENT AND PAYROLLS IN SELECTED COUNTIES WITH EMPLOYMENT OF 100,000 OR MORE
FOURTH QUARTER 1992

Data for 9 of the 10 counties in New York State in which average insured employment exceeds 100,000 or more are presented in the following tables. Westchester County is not included in this section as the industry detail for this county was shown in Table 4 in the preceding tables.

In order to safeguard the confidential nature of individual employer reports, data on some industries in some counties were consolidated into statistically valid groupings.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 54,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are

normally subject to revision annually. Current estimates are based on the March 1992 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Nonfarm Employment. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Reference Week of the Month. Employment, payrolls, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight of individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Production-Worker Averages. Average hours and earnings data are derived from reports of payrolls and hours for production and related workers in manufacturing and mining, construction workers in construction, and nonsupervisory employees in private service-producing industries.

Production and related workers include working supervisors and all nonsupervisory workers (including group leaders and trainees) engaged in fabricating, processing, assembling, inspecting, receiving, storing, handling, packing, warehousing, shipping, trucking, hauling, maintenance, repair, janitorial, guard services, product development, auxiliary production for plant's own use (e.g., power plant), recordkeeping, and other services closely associated with the above production operations.

Construction workers include the following employees in the construction division: Working supervisors, qualified craft workers, mechanics, apprentices, helpers, laborers, etc., engaged in new work, alterations, demolition, repair, maintenance, etc., whether working at the site of construction or working in shops or yards at jobs (such as precutting and preassembling) ordinarily performed by members of the construction trades.

Nonsupervisory employees include employees (not above the working supervisory level) such as office and clerical workers, repairers, salespersons, operators, drivers, physicians, lawyers, accountants, nurses, social workers, research aides, teachers, drafters, photographers, beauticians, musicians, restaurant workers, custodial workers, attendants, line installers and repairers, laborers, janitors, guards, and other employees at similar occupational levels whose services are closely associated with those of the employees listed.

--**Average Weekly Hours.** Represents total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--**Average Hourly Earnings.** Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--**Average Weekly Earnings.** Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

--**Average Weekly Overtime Hours.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

METROPOLITAN STATISTICAL AREA

A metropolitan statistical area (MSA) is defined according to a set of detailed standards prepared by the Federal Committee on MSAs. Under these standards, which were revised in 1980, areas are designated as an MSA in one of two ways: If there is a city of at least 50,000 population, or an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. In New York State, MSAs are defined in terms of entire counties. In addition to the county containing the main city, an MSA also includes additional counties having strong economic and social ties to the central county.

Most MSA definitions are not subject to change until after the next national census. However, supplemental announcements of a few new MSAs may be issued in the spring of each year, generally because additional cities have reached the 50,000 level according to official population estimates.

If an area has more than 1 million population and meets certain other specified requirements, it will now be termed a Consolidated Metropolitan Statistical Area (CMSA), consisting of major components recognized as Primary Metropolitan Statistical Areas (PMSAs).

A number of areas in the state do not meet the criteria for recognition as an MSA but estimates are published for them. These areas are called Labor Market Areas (LMAs).

The geographic composition of the areas is given below.

Albany-Schenectady-Troy MSA. Albany, Montgomery, Greene, Rensselaer, Saratoga and Schenectady counties.
Binghamton MSA. Broome and Tioga counties.
Buffalo-Niagara Falls CMSA. Erie and Niagara counties.
Buffalo PMSA. Erie County.
Elmira MSA. Chemung County.
Glens Falls MSA. Warren and Washington counties.
Nassau-Suffolk PMSA. Nassau and Suffolk counties.
New York City. Bronx, Kings, New York, Queens and Richmond counties.
New York Combined Area. Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties.
New York PMSA. New York City and Putnam, Rockland and Westchester counties.
Niagara Falls PMSA. Niagara County.
Orange County PMSA. Orange County.
Poughkeepsie MSA. Dutchess County.
Putnam LMA. Putnam County.
Rochester MSA. Livingston, Monroe, Ontario, Orleans and Wayne Counties.
Rockland LMA. Rockland County.
Syracuse MSA. Madison, Onondaga and Oswego counties.
Utica-Rome MSA. Herkimer and Oneida counties.
Westchester LMA. Westchester County.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1987 edition of the *Standard Industrial Classification (SIC) Manual* prepared by the U.S. Office of Management and Budget. For space requirements on the statistical tables, the formal SIC title for most of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1987 edition of the *SIC Manual-List of short SIC titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to total because of rounding.

Revisions. Revised figures are preceded by an "r" when first published.

KEY

Blank or-	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

Recurrent Report 8 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

1. **Employment in New York State (formerly Employment Trends).** Monthly for New York State. This newsletter provides an up-to-date summary of labor research issues and trends in New York State and selected regions. Current unemployment rates and area conditions are also reviewed.

2. **Labor Area Summary.** Monthly Statistical Report. This statistical report for all labor areas in the state shows nonagricultural wage and salary employment for the local area and civilian labor force data for the state, major labor areas and all counties.

3. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates.

4. **Collective Bargaining Settlements in New York State.** Quarterly. Summarizes changes in collective bargaining agreements covering wages that affect 250 or more workers. Covers wages and fringe benefits for agreements that affect 1,000 or more workers. Annual subscription $60. Individual issues $15 each.

5. **Calendar of Collective Bargaining, New York State.** Annual. This report lists all agreements covering 500 or more workers known to the Division of Research that expire or are subject to a wage reopening in the coming year. The report is organized by month of expiration or reopening and, within each month, by industry.

6. **Comparison of Key Unemployment Insurance Statistics (State by State).** Semiannual. Graphically compares New York State's unemployment insurance (UI) program with those of other states. Charts use key statistics such as average unemployment contributions per covered employer, average weekly benefit amounts and average weekly wage of UI covered employment.

7. **Tomorrow's Jobs - Tomorrow's Workers**. Annual. Provides information on economic conditions and the occupational supply and demand situation by geographic region. The reports are designed to assist human resource planners, educators and training providers to help identify training needs in each region. They include a list of demand occupations focusing on specific characteristics of occupations with reasonable hiring expectations (See page viii for map of regions).

New

8. **Occupational Outlook, 1993-1997.** Projects the demand for workers in various jobs in New York and its geographic regions. The report is based on occupational employment statistics surveys which examine occupational distributions on a three-year cycle. The surveys involve a statistical sample of industries throughout the state to obtain their occupational staffing patterns. See page viii for map of regions. (First copy is free. Additional copies are available at $5.00 per copy.)

SPECIAL REPORTS

Special Reports 12, 13, 15 and/or 16 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

9. **Occupational Briefs.** Supply career information for specific occupations. These booklets describe job duties, earnings, training requirements, employment outlook, locations of jobs, physical demands and working conditions, etc. Available for Secretary and Career Counselor.

10. **Occupational Guides.** Similar to Occupational Briefs. Guides have been developed for 128 occupations. Designed to provide the user with a better understanding of various occupations in a quick-read format and to assist those who may be making career choices or changes.

11. New **Affirmative Action Data - 1990 Census.** This booklet provides data from the 1990 Census for New York State by standard metropolitan statistical area (SMSAs) and counties for use in preparing or assessing affirmative actions plans. Tables show total, female and minority counts and percentages of population, civilian labor force measures and occupational groups. February 1993.

12. **The Jobseeker.** An 84-page guide designed primarily to assist young people entering the job market. Contains sections on the job market and labor force, kinds of employers, kinds of occupations, how to choose an occupation, chances of finding a job, what to do to find a job, how to prepare a resume, how to complete an employment application, how to do well at a job interview. Also contains occupational profiles on 152 occupations of interest to youth, with information on each regarding: number of employed, where found, job outlook, education needed, personal characteristics, and earnings. (First copy is free. Additional copies are available at $1.00 per copy.) October 1989.

13. **Occupations Licensed or Certified by New York State.** This publication contains licensing requirements for 65 occupations (training, tests and fees) as well as information on employment outlook, earnings, and working conditions for these occupations. The report also includes a list of apprenticeable occupations. March 1990. Price $10.00.

14. **Directory of Labor Market Information.** Includes brief descriptions of recurring New York State Labor Department publications and data series that refer directly to the labor market as well as a guide to other sources of labor market information. Lists local labor market analysts to contact for additional information . 52 pages.

15. **Labor Force 2000.** Contains civilian labor force projections for New York State and its economic development regions for the year 2000. Includes conservative, moderate and expansive scenarios for New York State. This report was chosen for the 1990 Notable Documents Award by the Government Documents Roundtable of the New York State Library Association. (First copy is free. Additional copies are available at $5.00 per copy.) June 1990.

16. **The Industry Finder.** Designed to assist individuals who have selected an occupation of interest to find the industries in which the occupation is concentrated. The report will often lead to industries that would not have been obvious choices in selecting potential employers or job opportunities. There are 68 pages of industries showing the number employed and the percent of total employment in each industry for 250 selected occupations. November 1990. Price $5.00.

B-PUBLICATIONS

244. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1989.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1989.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Communications, New York State Department of Labor, W. Averell Harriman State Office Building Campus,Albany, New York 12240.

254. **Directory of Labor Unions and Employee Organizations in New York State, 1992.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price **$15.00.**

LABOR RESEARCH REPORTS

92-2. **A study of the Farm Labor Contractor System in New York State, July 1992.** A brief overview of the state's farm labor contractor system and its role in recruiting agricultural workers. Also included is a survey of public perceptions and attitudes, as well as suggested legislative or administrative changes which would enhance the system.

92-3. **Occupational Injuries and Illnesses Survey, State and Local Government, New York State, 1991.** An annual survey by the Labor Department of work-related fatalities, injuries and illnesses in the public sector. The survey is required by the New York Public Employee Safety and Health Act of 1980.

92-4. **New York City Residents Participating in the New York State Apprentice Training Program, Construction Trades, January 1967 - December 1991.** An overview of the relative success of the New York State Apprentice Training Program in serving New York City residents who were enrolled as construction trade apprentices. The study includes a 25-year analysis of enrollment and program termination trends by trade, sex and ethnic and age group.

93-1. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1990.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1990.

MONTH IN REVIEW
September 1993

Civilian Labor Force

The state unemployment rate decreased to 7.1 percent in September 1993 from 7.5 percent in August as unemployment as well as employment decreased. A year ago the state unemployment rate was 8.8 percent. The labor force (sum of the employed and unemployment) fell to its lowest level for the month of September since 1984. New York City's unemployment rate dropped to 8.7 percent in September, down from 9.5 percent in August and 11.4 percent in September a year ago.

The nation's unemployment rate decreased slightly in September, falling to 6.4 percent from 6.5 percent in August. Here too, unemployment as well as employment declined. The nation's unemployment rate was at its lowest level for September since 1991 when the rate was also 6.4 percent. A year ago the national unemployment rate stood at 7.2 percent.

Unemployment in the state decreased 50,000 from August to 595,000 in September. In September 1993, about 152,000 fewer persons were unemployed than in September 1992.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) increased 26,000 from August 1993 to 7,701,400 in September.

In September, over-the-month job gains occurred in services (+ 11,400), government (+ 8,400), transportation and public utilities (+ 8,400) and manufacturing (+ 4,800). Recalls in private and public education following summer recess dominated employment gains in services and the public sector. Seasonal downturns in hotel and amusement and recreation staffing dampened job gains in services. The completion of the Job Training Partnership Act summer youth program nearly offset job gains due to reopening of local schools. Recall of bus drivers at the start of the school year accounted for the bulk of the increase in transportation and public utilities employment although trucking and warehousing also showed a modest gain. Other industries in the transportation division experienced job losses of 1,300 or less.

Sixty-five percent of the increase in manufacturing employment occurred in durable goods; the industrial machinery and equipment, miscellaneous manufacturing and electronic and electric equipment industries posted the largest gains. Seasonal employment increases in the apparel industry accounted for most of the job gain in nondurable goods manufacturing.

Finance, insurance and real estate (-3,900), trade (-1,600), construction (-1,400) and mining (-100) posted employment losses in September. Commercial banks and savings institutions experienced the largest declines in the finance, insurance and real estate division, while the securities and life insurance industries posted lesser declines. Real estate employment was up slightly in September. A 2,900 job loss in wholesale trade was tempered by a 1,300 job increase in retail trade. Employment declined in all wholesale trade industries and the job gains at eating and drinking establishments led the retail trade job increase. A modest employment increase in heavy construction tempered seasonal cutbacks by general building contractors and special trade contractors.

Compared with a year ago, nonfarm employment was down 16,200 or less than one percent; all industry divisions except services and construction shared in the decline. Job levels have decreased in manufacturing (-39,700 or -3.9 percent), transportation and public utilities (-8,400 or -2.1 percent), trade (-8,200 or -0.5 percent), government (-6,100 or -0.4 percent) finance, insurance and real estate (-3,900 or -0.5 percent) and mining (-100 or -1.9 percent). Service jobs increased 49,400 (+ 2.1 percent) while construction employment was up 800 (less than one percent).

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 54,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are

normally subject to revision annually. Current estimates are based on the March 1992 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Nonfarm Employment. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Reference Week of the Month. Employment, payrolls, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight of individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Production-Worker Averages. Average hours and earnings data are derived from reports of payrolls and hours for production and related workers in manufacturing and mining, construction workers in construction, and nonsupervisory employees in private service-producing industries.

Production and related workers include working supervisors and all nonsupervisory workers (including group leaders and trainees) engaged in fabricating, processing, assembling, inspecting, receiving, storing, handling, packing, warehousing, shipping, trucking, hauling, maintenance, repair, janitorial, guard services, product development, auxiliary production for plant's own use (e.g., power plant), recordkeeping, and other services closely associated with the above production operations.

Construction workers include the following employees in the construction division: Working supervisors, qualified craft workers, mechanics, apprentices, helpers, laborers, etc., engaged in new work, alterations, demolition, repair, maintenance, etc., whether working at the site of construction or working in shops or yards at jobs (such as precutting and preassembling) ordinarily performed by members of the construction trades.

Nonsupervisory employees include employees (not above the working supervisory level) such as office and clerical workers, repairers, salespersons, operators, drivers, physicians, lawyers, accountants, nurses, social workers, research aides, teachers, drafters, photographers, beauticians, musicians, restaurant workers, custodial workers, attendants, line installers and repairers, laborers, janitors, guards, and other employees at similar occupational levels whose services are closely associated with those of the employees listed.

--**Average Weekly Hours.** Represents total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--**Average Hourly Earnings.** Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--**Average Weekly Earnings.** Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

--**Average Weekly Overtime Hours.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

METROPOLITAN STATISTICAL AREA

A metropolitan statistical area (MSA) is defined according to a set of detailed standards prepared by the Federal Committee on MSAs. Under these standards, which were revised in 1980, areas are designated as an MSA in one of two ways: If there is a city of at least 50,000 population, or an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. In New York State, MSAs are defined in terms of entire counties. In addition to the county containing the main city, an MSA also includes additional counties having strong economic and social ties to the central county.

Most MSA definitions are not subject to change until after the next national census. However, supplemental announcements of a few new MSAs may be issued in the spring of each year, generally because additional cities have reached the 50,000 level according to official population estimates.

If an area has more than 1 million population and meets certain other specified requirements, it will now be termed a Consolidated Metropolitan Statistical Area (CMSA), consisting of major components recognized as Primary Metropolitan Statistical Areas (PMSAs).

A number of areas in the state do not meet the criteria for recognition as an MSA but estimates are published for them. These areas are called Labor Market Areas (LMAs).

The geographic composition of the areas is given below.

Albany-Schenectady-Troy MSA. Albany, Montgomery, Greene, Rensselaer, Saratoga and Schenectady counties.
Binghamton MSA. Broome and Tioga counties.
Buffalo-Niagara Falls CMSA. Erie and Niagara counties.
Buffalo PMSA. Erie County.
Elmira MSA. Chemung County.
Glens Falls MSA. Warren and Washington counties.
Nassau-Suffolk PMSA. Nassau and Suffolk counties.
New York City. Bronx, Kings, New York, Queens and Richmond counties.
New York Combined Area. Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties.
New York PMSA. New York City and Putnam, Rockland and Westchester counties.
Niagara Falls PMSA. Niagara County.
Orange County PMSA. Orange County.
Poughkeepsie MSA. Dutchess County.
Putnam LMA. Putnam County.
Rochester MSA. Livingston, Monroe, Ontario, Orleans and Wayne Counties.
Rockland LMA. Rockland County.
Syracuse MSA. Madison, Onondaga and Oswego counties.
Utica-Rome MSA. Herkimer and Oneida counties.
Westchester LMA. Westchester County.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1987 edition of the *Standard Industrial Classification (SIC) Manual* prepared by the U.S. Office of Management and Budget. For space requirements on the statistical tables, the formal SIC title for most of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1987 edition of the *SIC Manual-List of short SIC titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to total because of rounding.

Revisions. Revised figures are preceded by an "r" when first published.

KEY

Blank or-	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

Recurrent Report 8 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

1. **Employment in New York State (formerly Employment Trends).** Monthly for New York State. This newsletter provides an up-to-date summary of labor research issues and trends in New York State and selected regions. Current unemployment rates and area conditions are also reviewed.

2. **Labor Area Summary.** Monthly Statistical Report. This statistical report for all labor areas in the state shows nonagricultural wage and salary employment for the local area and civilian labor force data for the state, major labor areas and all counties.

3. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates.

4. **Collective Bargaining Settlements in New York State.** Quarterly. Summarizes changes in collective bargaining agreements covering wages that affect 250 or more workers. Covers wages and fringe benefits for agreements that affect 1,000 or more workers. Annual subscription $60. Individual issues $15 each.

5. **Calendar of Collective Bargaining, New York State.** Annual. This report lists all agreements covering 500 or more workers known to the Division of Research that expire or are subject to a wage reopening in the coming year. The report is organized by month of expiration or reopening and, within each month, by industry.

6. **Comparison of Key Unemployment Insurance Statistics (State by State).** Semiannual. Graphically compares New York State's unemployment insurance (UI) program with those of other states. Charts use key statistics such as average unemployment contributions per covered employer, average weekly benefit amounts and average weekly wage of UI covered employment.

7. **Tomorrow's Jobs - Tomorrow's Workers**. Annual. Provides information on economic conditions and the occupational supply and demand situation by geographic region. The reports are designed to assist human resource planners, educators and training providers to help identify training needs in each region. They include a list of demand occupations focusing on specific characteristics of occupations with reasonable hiring expectations (See page viii for map of regions).

New

8. **Occupational Outlook, 1993-1997.** Projects the demand for workers in various jobs in New York and its geographic regions. The report is based on occupational employment statistics surveys which examine occupational distributions on a three-year cycle. The surveys involve a statistical sample of industries throughout the state to obtain their occupational staffing patterns. See page viii for map of regions. (First copy is free. Additional copies are available at $5.00 per copy.)

SPECIAL REPORTS

Special Reports 12, 13, 15 and/or 16 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

9. **Occupational Briefs.** Supply career information for specific occupations. These booklets describe job duties, earnings, training requirements, employment outlook, locations of jobs, physical demands and working conditions, etc. Available for Secretary and Career Counselor.

10. **Occupational Guides.** Similar to Occupational Briefs. Guides have been developed for 128 occupations. Designed to provide the user with a better understanding of various occupations in a quick-read format and to assist those who may be making career choices or changes.

New

11. **Affirmative Action Data - 1990 Census.** This booklet provides data from the 1990 Census for New York State by standard metropolitan statistical area (SMSAs) and counties for use in preparing or assessing affirmative actions plans. Tables show total, female and minority counts and percentages of population, civilian labor force measures and occupational groups. February 1993.

12. **The Jobseeker.** An 84-page guide designed primarily to assist young people entering the job market. Contains sections on the job market and labor force, kinds of employers, kinds of occupations, how to choose an occupation, chances of finding a job, what to do to find a job, how to prepare a resume, how to complete an employment application, how to do well at a job interview. Also contains occupational profiles on 152 occupations of interest to youth, with information on each regarding: number of employed, where found, job outlook, education needed, personal characteristics, and earnings. (First copy is free. Additional copies are available at $1.00 per copy.) October 1989.

13. **Occupations Licensed or Certified by New York State.** This publication contains licensing requirements for 65 occupations (training, tests and fees) as well as information on employment outlook, earnings, and working conditions for these occupations. The report also includes a list of apprenticeable occupations. March 1990. Price $10.00.

14. **Directory of Labor Market Information.** Includes brief descriptions of recurring New York State Labor Department publications and data series that refer directly to the labor market as well as a guide to other sources of labor market information. Lists local labor market analysts to contact for additional information . 52 pages.

15. **Labor Force 2000.** Contains civilian labor force projections for New York State and its economic development regions for the year 2000. Includes conservative, moderate and expansive scenarios for New York State. This report was chosen for the 1990 Notable Documents Award by the Government Documents Roundtable of the New York State Library Association. (First copy is free. Additional copies are available at $5.00 per copy.) June 1990.

16. **The Industry Finder.** Designed to assist individuals who have selected an occupation of interest to find the industries in which the occupation is concentrated. The report will often lead to industries that would not have been obvious choices in selecting potential employers or job opportunities. There are 68 pages of industries showing the number employed and the percent of total employment in each industry for 250 selected occupations. November 1990. Price $5.00.

B-PUBLICATIONS

244. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1989.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1989.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Communications, New York State Department of Labor, W. Averell Harriman State Office Building Campus, Albany, New York 12240.

254. **Directory of Labor Unions and Employee Organizations in New York State, 1992.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price **$15.00.**

LABOR RESEARCH REPORTS

92-2. **A study of the Farm Labor Contractor System in New York State, July 1992.** A brief overview of the state's farm labor contractor system and its role in recruiting agricultural workers. Also included is a survey of public perceptions and attitudes, as well as suggested legislative or administrative changes which would enhance the system.

92-3. **Occupational Injuries and Illnesses Survey, State and Local Government, New York State, 1991.** An annual survey by the Labor Department of work-related fatalities, injuries and illnesses in the public sector. The survey is required by the New York Public Employee Safety and Health Act of 1980.

92-4. **New York City Residents Participating in the New York State Apprentice Training Program, Construction Trades, January 1967 - December 1991.** An overview of the relative success of the New York State Apprentice Training Program in serving New York City residents who were enrolled as construction trade apprentices. The study includes a 25-year analysis of enrollment and program termination trends by trade, sex and ethnic and age group.

93-1. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1990.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1990.

MONTH IN REVIEW
October 1993

Civilian Labor Force

The state unemployment rate increased by 0.4 of a percentage point from September to 7.5 percent in October 1993. Although unemployment was up over the month, employment increased also, suggesting some labor market improvement. One year ago the state unemployment rate was 8.2 percent. The New York City unemployment rate was 10.3 percent in October, up from 8.7 percent in September. Unemployment in New York City was 11 percent in October 1992.

The comparable national jobless rate (not seasonally adjusted) was 6.3 percent in October, down from the September level of 6.4 percent. The national unemployment rate in October 1992 was 6.8 percent.

Total unemployment increased 38,000 over the month to 633,000. About 62,000 fewer persons were unemployed than a year ago.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) increased 69,200 from September 1993 to 7,770,600 in October, the greatest September-to-October job gain since 1988 and better than the 48,900 10-year average gain. Increased hiring in the public sector (+ 38,200) and services (+ 28,400) spearheaded the upturn. Employment levels also increased in trade, transportation and public utilities, and mining. Manufacturing, construction, and finance, insurance and real estate jobs declined from September levels.

Increased noninstitutional staffing by local school districts accounted for the bulk of the job gain in the public sector. A small increase in state government staffing offset a decline in federal government jobs. Seasonal staff increases in private education accounted for over half the employment gain in services. Most other service industries posted lesser job gains over the month, but employment levels fell in amusement and recreation services, and hotels.

Increased retail trade employment (+ 5,300) accounted for all but 500 of the October increase in the trade division. All retail industries except building materials and garden supplies, and eating and drinking places showed higher job levels.

Transportation and public utilities jobs advanced 2,100 in October; recalls of school bus operators accounted for four-fifths of the October gain in that division. Trucking was the only other industry to show job gains of any significance.

Manufacturing employment was down 2,300 in October. Declines in durable goods manufacturing accounted for 60 percent of the drop with transportation equipment, instruments, industrial machinery, primary metals, stone, clay and glass; and furniture and fixtures each posting declines of 1,000 or less. Lumber and wood products, fabricated metals, electronic and electric equipment and miscellane-ous manufacturing showed small employment increases. Among durable goods manufacturers, job losses in the apparel, food, paper, and chemicals industries were softened by modest gains in printing and publishing, and rubber and plastic manufacturing. Leather, and textile mill products employment levels were unchanged.

Cutbacks by special trade contractors and general building contractors accounted for a 1,900 decline in construction employment in October, far less than the average October decline for this division. The number of heavy construction jobs were unchanged from a month ago. Finance, insurance and real estate employment was down 1,100 in October with drops in banking, real estate, and insurance jobs tempered by increased hiring by security brokers and holding offices.

Over the last 12 months, nonfarm employment increased 5,200. Increases in services (+ 55,100) and construction (+ 6,200) were nearly offset by declines in manufacturing (-36,500), trade (-8,100), transportation and public utilities (-5,300), government (-3,700) and finance, insurance and real estate (-2,300). Mining employment was unchanged over the year.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 54,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are

normally subject to revision annually. Current estimates are based on the March 1992 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Nonfarm Employment. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Reference Week of the Month. Employment, payrolls, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight of individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Production-Worker Averages. Average hours and earnings data are derived from reports of payrolls and hours for production and related workers in manufacturing and mining, construction workers in construction, and nonsupervisory employees in private service-producing industries.

Production and related workers include working supervisors and all nonsupervisory workers (including group leaders and trainees) engaged in fabricating, processing, assembling, inspecting, receiving, storing, handling, packing, warehousing, shipping, trucking, hauling, maintenance, repair, janitorial, guard services, product development, auxiliary production for plant's own use (e.g., power plant), recordkeeping, and other services closely associated with the above production operations.

Construction workers include the following employees in the construction division: Working supervisors, qualified craft workers, mechanics, apprentices, helpers, laborers, etc., engaged in new work, alterations, demolition, repair, maintenance, etc., whether working at the site of construction or working in shops or yards at jobs (such as precutting and preassembling) ordinarily performed by members of the construction trades.

Nonsupervisory employees include employees (not above the working supervisory level) such as office and clerical workers, repairers, salespersons, operators, drivers, physicians, lawyers, accountants, nurses, social workers, research aides, teachers, drafters, photographers, beauticians, musicians, restaurant workers, custodial workers, attendants, line installers and repairers, laborers, janitors, guards, and other employees at similar occupational levels whose services are closely associated with those of the employees listed.

--**Average Weekly Hours.** Represents total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--**Average Hourly Earnings.** Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--**Average Weekly Earnings.** Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

--**Average Weekly Overtime Hours.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

METROPOLITAN STATISTICAL AREA

A metropolitan statistical area (MSA) is defined according to a set of detailed standards prepared by the Federal Committee on MSAs. Under these standards, which were revised in 1980, areas are designated as an MSA in one of two ways: If there is a city of at least 50,000 population, or an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. In New York State, MSAs are defined in terms of entire counties. In addition to the county containing the main city, an MSA also includes additional counties having strong economic and social ties to the central county.

Most MSA definitions are not subject to change until after the next national census. However, supplemental announcements of a few new MSAs may be issued in the spring of each year, generally because additional cities have reached the 50,000 level according to official population estimates.

If an area has more than 1 million population and meets certain other specified requirements, it will now be termed a Consolidated Metropolitan Statistical Area (CMSA), consisting of major components recognized as Primary Metropolitan Statistical Areas (PMSAs).

A number of areas in the state do not meet the criteria for recognition as an MSA but estimates are published for them. These areas are called Labor Market Areas (LMAs).

The geographic composition of the areas is given below.

Albany-Schenectady-Troy MSA. Albany, Montgomery, Greene, Rensselaer, Saratoga and Schenectady counties.
Binghamton MSA. Broome and Tioga counties.
Buffalo-Niagara Falls CMSA. Erie and Niagara counties.
Buffalo PMSA. Erie County.
Elmira MSA. Chemung County.
Glens Falls MSA. Warren and Washington counties.
Nassau-Suffolk PMSA. Nassau and Suffolk counties.
New York City. Bronx, Kings, New York, Queens and Richmond counties.
New York Combined Area. Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties.
New York PMSA. New York City and Putnam, Rockland and Westchester counties.
Niagara Falls PMSA. Niagara County.
Orange County PMSA. Orange County.
Poughkeepsie MSA. Dutchess County.
Putnam LMA. Putnam County.
Rochester MSA. Livingston, Monroe, Ontario, Orleans and Wayne Counties.
Rockland LMA. Rockland County.
Syracuse MSA. Madison, Onondaga and Oswego counties.
Utica-Rome MSA. Herkimer and Oneida counties.
Westchester LMA. Westchester County.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1987 edition of the *Standard Industrial Classification (SIC) Manual* prepared by the U.S. Office of Management and Budget. For space requirements on the statistical tables, the formal SIC title for most of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1987 edition of the *SIC Manual-List of short SIC titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to total because of rounding.

Revisions. Revised figures are preceded by an "r" when first published.

KEY

Blank or-	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

Recurrent Report 8 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

1. **Employment in New York State (formerly Employment Trends).** Monthly for New York State. This newsletter provides an up-to-date summary of labor research issues and trends in New York State and selected regions. Current unemployment rates and area conditions are also reviewed.

2. **Labor Area Summary.** Monthly Statistical Report. This statistical report for all labor areas in the state shows nonagricultural wage and salary employment for the local area and civilian labor force data for the state, major labor areas and all counties.

3. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates.

4. **Collective Bargaining Settlements in New York State.** Quarterly. Summarizes changes in collective bargaining agreements covering wages that affect 250 or more workers. Covers wages and fringe benefits for agreements that affect 1,000 or more workers. Annual subscription $60. Individual issues $15 each.

5. **Calendar of Collective Bargaining, New York State.** Annual. This report lists all agreements covering 500 or more workers known to the Division of Research that expire or are subject to a wage reopening in the coming year. The report is organized by month of expiration or reopening and, within each month, by industry.

6. **Comparison of Key Unemployment Insurance Statistics (State by State).** Semiannual. Graphically compares New York State's unemployment insurance (UI) program with those of other states. Charts use key statistics such as average unemployment contributions per covered employer, average weekly benefit amounts and average weekly wage of UI covered employment.

7. **Tomorrow's Jobs - Tomorrow's Workers**. Annual. Provides information on economic conditions and the occupational supply and demand situation by geographic region. The reports are designed to assist human resource planners, educators and training providers to help identify training needs in each region. They include a list of demand occupations focusing on specific characteristics of occupations with reasonable hiring expectations (See page viii for map of regions).

New

8. **Occupational Outlook, 1993-1997.** Projects the demand for workers in various jobs in New York and its geographic regions. The report is based on occupational employment statistics surveys which examine occupational distributions on a three-year cycle. The surveys involve a statistical sample of industries throughout the state to obtain their occupational staffing patterns. See page viii for map of regions. (First copy is free. Additional copies are available at $5.00 per copy.)

SPECIAL REPORTS

Special Reports 12, 13, 15 and/or 16 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

9. **Occupational Briefs.** Supply career information for specific occupations. These booklets describe job duties, earnings, training requirements, employment outlook, locations of jobs, physical demands and working conditions, etc. Available for Secretary and Career Counselor.

10. **Occupational Guides.** Similar to Occupational Briefs. Guides have been developed for 128 occupations. Designed to provide the user with a better understanding of various occupations in a quick-read format and to assist those who may be making career choices or changes.

New

11. **Affirmative Action Data - 1990 Census.** This booklet provides data from the 1990 Census for New York State by standard metropolitan statistical area (SMSAs) and counties for use in preparing or assessing affirmative actions plans. Tables show total, female and minority counts and percentages of population, civilian labor force measures and occupational groups. February 1993.

12. **The Jobseeker.** An 84-page guide designed primarily to assist young people entering the job market. Contains sections on the job market and labor force, kinds of employers, kinds of occupations, how to choose an occupation, chances of finding a job, what to do to find a job, how to prepare a resume, how to complete an employment application, how to do well at a job interview. Also contains occupational profiles on 152 occupations of interest to youth, with information on each regarding: number of employed, where found, job outlook, education needed, personal characteristics, and earnings. (First copy is free. Additional copies are available at $1.00 per copy.) October 1989.

13. **Occupations Licensed or Certified by New York State.** This publication contains licensing requirements for 65 occupations (training, tests and fees) as well as information on employment outlook, earnings, and working conditions for these occupations. The report also includes a list of apprenticeable occupations. March 1990. Price $10.00.

14. **Directory of Labor Market Information.** Includes brief descriptions of recurring New York State Labor Department publications and data series that refer directly to the labor market as well as a guide to other sources of labor market information. Lists local labor market analysts to contact for additional information . 52 pages.

15. **Labor Force 2000.** Contains civilian labor force projections for New York State and its economic development regions for the year 2000. Includes conservative, moderate and expansive scenarios for New York State. This report was chosen for the 1990 Notable Documents Award by the Government Documents Roundtable of the New York State Library Association. (First copy is free. Additional copies are available at $5.00 per copy.) June 1990.

16. **The Industry Finder.** Designed to assist individuals who have selected an occupation of interest to find the industries in which the occupation is concentrated. The report will often lead to industries that would not have been obvious choices in selecting potential employers or job opportunities. There are 68 pages of industries showing the number employed and the percent of total employment in each industry for 250 selected occupations. November 1990. Price $5.00.

B-PUBLICATIONS

244. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1989.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1989.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Communications, New York State Department of Labor, W. Averell Harriman State Office Building Campus,Albany, New York 12240.

254. **Directory of Labor Unions and Employee Organizations in New York State, 1992.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $15.00.

LABOR RESEARCH REPORTS

92-2. **A study of the Farm Labor Contractor System in New York State, July 1992.** A brief overview of the state's farm labor contractor system and its role in recruiting agricultural workers. Also included is a survey of public perceptions and attitudes, as well as suggested legislative or administrative changes which would enhance the system.

92-3. **Occupational Injuries and Illnesses Survey, State and Local Government, New York State, 1991.** An annual survey by the Labor Department of work-related fatalities, injuries and illnesses in the public sector. The survey is required by the New York Public Employee Safety and Health Act of 1980.

92-4. **New York City Residents Participating in the New York State Apprentice Training Program, Construction Trades, January 1967 - December 1991.** An overview of the relative success of the New York State Apprentice Training Program in serving New York City residents who were enrolled as construction trade apprentices. The study includes a 25-year analysis of enrollment and program termination trends by trade, sex and ethnic and age group.

93-1. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1990.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1990.

93-2. **Post-Apprenticeship Experience of Participants in New York State Apprenticeship Programs, 1990-1991.** The results of a survey of former apprentices to obtain information on the training experience, job search and subsequent employment of those who had been enrolled in an apprenticeship program. The focus of this particular study was on exploring whether any notable differences existed in the apprenticeship experience of white male or minority male or female apprenticeships.

MONTH IN REVIEW
November 1993

Civilian Labor Force

The state unemployment rate decreased to 7.2 percent in November 1993 from 7.5 percent in October as unemployment moved lower and employment was essentially unchanged. In November 1992 the state unemployment rate was 7.8 percent. The New York City unemployment rate was 10.2 percent in November, down from 10.3 percent in October and down from 10.5 percent in November 1992.

The comparable national jobless rate (not seasonally adjusted) was 6.1 percent in November, down from the October level of 6.3 percent and down from the November 1992 level of 7.0 percent.

Unemployment in the state decreased 22,000 over the month to 611,000 in November 1993. About 53,000 fewer persons were unemployed than a year ago.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) increased 40,800 from October 1993 to 7,811,400 in November, the greatest October-to-November job gain since 1988. Trade (+ 23,400), public employment (+ 15,000), and services (+ 10,800) accounted for most of the November job gain; transportation and public utilities, and finance, insurance and real estate each posted modest increases in employment. Construction (-6,500), manufacturing (-2,200) and mining (-100) were down from October levels.

The increase in trade employment was the largest October-to-November gain since 1989 when it was up 23,900. Seasonal hiring by retail establishments accounted for all but 100 of the November job increase; all retail industries except eating places and building materials experienced increased employment levels.

Seasonal staffing by local school districts and temporary election day staffing accounted for the bulk of the public sector job increase in November. Federal government jobs increased slightly while state government employment posted a slight decline.

Within the services sector, increased employment levels in educational services, health services, and business services accounted for most of the largest over-the-month job gain in this industry division since 1988. Social services, and engineering and management services had lesser gains. Hotels, and amusement and recreation services posted modest seasonal declines. Transportation and public utilities, and finance, insurance and real estate employment each were up 200 over October levels.

The bulk of the decline in construction jobs occurred in the heavy construction and special trade contractors industries, while general building contractor employment dropped only slightly.

More than three-quarters of the cutbacks in manufacturing employment occurred in nondurable goods, mostly in the highly seasonal apparel industry. Employment in most other nondurable manufacturing industries dropped 400 or less, but printing and publishing jobs were up slightly. Durable goods manufacturing job losses outweighed durable goods job gains by 600.

Nonfarm employment was up 100 (+ 0.1 percent) since November 1992. Increased employment in the services sector (+ 59,000 or + 2.5 percent) and construction (+ 7,800 or + 3.3 percent) were nearly offset by drops in manufacturing (-34,900 or -3.5 percent), government (-8,300 or -0.6 percent), trade (-6,700 or -0.4 percent), transportation and public utilities (-3,500 or 0.9 percent), and finance, insurance and real estate (-3,400 or -0.5 percent).

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 54,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are

normally subject to revision annually. Current estimates are based on the March 1992 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Nonfarm Employment. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Reference Week of the Month. Employment, payrolls, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight of individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Production-Worker Averages. Average hours and earnings data are derived from reports of payrolls and hours for production and related workers in manufacturing and mining, construction workers in construction, and nonsupervisory employees in private service-producing industries.

Production and related workers include working supervisors and all nonsupervisory workers (including group leaders and trainees) engaged in fabricating, processing, assembling, inspecting, receiving, storing, handling, packing, warehousing, shipping, trucking, hauling, maintenance, repair, janitorial, guard services, product development, auxiliary production for plant's own use (e.g., power plant), recordkeeping, and other services closely associated with the above production operations.

Construction workers include the following employees in the construction division: Working supervisors, qualified craft workers, mechanics, apprentices, helpers, laborers, etc., engaged in new work, alterations, demolition, repair, maintenance, etc., whether working at the site of construction or working in shops or yards at jobs (such as precutting and preassembling) ordinarily performed by members of the construction trades.

Nonsupervisory employees include employees (not above the working supervisory level) such as office and clerical workers, repairers, salespersons, operators, drivers, physicians, lawyers, accountants, nurses, social workers, research aides, teachers, drafters, photographers, beauticians, musicians, restaurant workers, custodial workers, attendants, line installers and repairers, laborers, janitors, guards, and other employees at similar occupational levels whose services are closely associated with those of the employees listed.

--**Average Weekly Hours.** Represents total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--**Average Hourly Earnings.** Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--**Average Weekly Earnings.** Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

--**Average Weekly Overtime Hours.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

METROPOLITAN STATISTICAL AREA

A metropolitan statistical area (MSA) is defined according to a set of detailed standards prepared by the Federal Committee on MSAs. Under these standards, which were revised in 1980, areas are designated as an MSA in one of two ways: If there is a city of at least 50,000 population, or an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. In New York State, MSAs are defined in terms of entire counties. In addition to the county containing the main city, an MSA also includes additional counties having strong economic and social ties to the central county.

Most MSA definitions are not subject to change until after the next national census. However, supplemental announcements of a few new MSAs may be issued in the spring of each year, generally because additional cities have reached the 50,000 level according to official population estimates.

If an area has more than 1 million population and meets certain other specified requirements, it will now be termed a Consolidated Metropolitan Statistical Area (CMSA), consisting of major components recognized as Primary Metropolitan Statistical Areas (PMSAs).

A number of areas in the state do not meet the criteria for recognition as an MSA but estimates are published for them. These areas are called Labor Market Areas (LMAs).

The geographic composition of the areas is given below.

Albany-Schenectady-Troy MSA. Albany, Montgomery, Greene, Rensselaer, Saratoga and Schenectady counties.
Binghamton MSA. Broome and Tioga counties.
Buffalo-Niagara Falls CMSA. Erie and Niagara counties.
Buffalo PMSA. Erie County.
Elmira MSA. Chemung County.
Glens Falls MSA. Warren and Washington counties.
Nassau-Suffolk PMSA. Nassau and Suffolk counties.
New York City. Bronx, Kings, New York, Queens and Richmond counties.
New York Combined Area. Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties.
New York PMSA. New York City and Putnam, Rockland and Westchester counties.
Niagara Falls PMSA. Niagara County.
Orange County PMSA. Orange County.
Poughkeepsie MSA. Dutchess County.
Putnam LMA. Putnam County.
Rochester MSA. Livingston, Monroe, Ontario, Orleans and Wayne Counties.
Rockland LMA. Rockland County.
Syracuse MSA. Madison, Onondaga and Oswego counties.
Utica-Rome MSA. Herkimer and Oneida counties.
Westchester LMA. Westchester County.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1987 edition of the *Standard Industrial Classification (SIC) Manual* prepared by the U.S. Office of Management and Budget. For space requirements on the statistical tables, the formal SIC title for most of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1987 edition of the *SIC Manual-List of short SIC titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to total because of rounding.

Revisions. Revised figures are preceded by an "r" when first published.

KEY

Blank or -	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

Recurrent Report 8 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

1. **Employment in New York State (formerly Employment Trends).** Monthly for New York State. This newsletter provides an up-to-date summary of labor research issues and trends in New York State and selected regions. Current unemployment rates and area conditions are also reviewed.

2. **Labor Area Summary.** Monthly Statistical Report. This statistical report for all labor areas in the state shows nonagricultural wage and salary employment for the local area and civilian labor force data for the state, major labor areas and all counties.

3. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates.

4. **Collective Bargaining Settlements in New York State.** Quarterly. Summarizes changes in collective bargaining agreements covering wages that affect 250 or more workers. Covers wages and fringe benefits for agreements that affect 1,000 or more workers. Annual subscription $60. Individual issues $15 each.

5. **Calendar of Collective Bargaining, New York State.** Annual. This report lists all agreements covering 500 or more workers known to the Division of Research that expire or are subject to a wage reopening in the coming year. The report is organized by month of expiration or reopening and, within each month, by industry.

6. **Comparison of Key Unemployment Insurance Statistics (State by State).** Semiannual. Graphically compares New York State's unemployment insurance (UI) program with those of other states. Charts use key statistics such as average unemployment contributions per covered employer, average weekly benefit amounts and average weekly wage of UI covered employment.

7. **Tomorrow's Jobs - Tomorrow's Workers**. Annual. Provides information on economic conditions and the occupational supply and demand situation by geographic region. The reports are designed to assist human resource planners, educators and training providers to help identify training needs in each region. They include a list of demand occupations focusing on specific characteristics of occupations with reasonable hiring expectations (See page viii for map of regions).

New

8. **Occupational Outlook, 1993-1997.** Projects the demand for workers in various jobs in New York and its geographic regions. The report is based on occupational employment statistics surveys which examine occupational distributions on a three-year cycle. The surveys involve a statistical sample of industries throughout the state to obtain their occupational staffing patterns. See page viii for map of regions. (First copy is free. Additional copies are available at $5.00 per copy.)

SPECIAL REPORTS

Special Reports 12, 13, 15 and/or 16 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

9. **Occupational Briefs.** Supply career information for specific occupations. These booklets describe job duties, earnings, training requirements, employment outlook, locations of jobs, physical demands and working conditions, etc. Available for Secretary and Career Counselor.

10. **Occupational Guides.** Similar to Occupational Briefs. Guides have been developed for 128 occupations. Designed to provide the user with a better understanding of various occupations in a quick-read format and to assist those who may be making career choices or changes.

New

11. **Affirmative Action Data - 1990 Census.** This booklet provides data from the 1990 Census for New York State by standard metropolitan statistical area (SMSAs) and counties for use in preparing or assessing affirmative actions plans. Tables show total, female and minority counts and percentages of population, civilian labor force measures and occupational groups. February 1993.

12. **The Jobseeker.** An 84-page guide designed primarily to assist young people entering the job market. Contains sections on the job market and labor force, kinds of employers, kinds of occupations, how to choose an occupation, chances of finding a job, what to do to find a job, how to prepare a resume, how to complete an employment application, how to do well at a job interview. Also contains occupational profiles on 152 occupations of interest to youth, with information on each regarding: number of employed, where found, job outlook, education needed, personal characteristics, and earnings. (First copy is free. Additional copies are available at $1.00 per copy.) October 1989.

13. **Occupations Licensed or Certified by New York State.** This publication contains licensing requirements for 65 occupations (training, tests and fees) as well as information on employment outlook, earnings, and working conditions for these occupations. The report also includes a list of apprenticeable occupations. March 1990. Price $10.00.

14. **Directory of Labor Market Information.** Includes brief descriptions of recurring New York State Labor Department publications and data series that refer directly to the labor market as well as a guide to other sources of labor market information. Lists local labor market analysts to contact for additional information . 52 pages.

15. **Labor Force 2000.** Contains civilian labor force projections for New York State and its economic development regions for the year 2000. Includes conservative, moderate and expansive scenarios for New York State. This report was chosen for the 1990 Notable Documents Award by the Government Documents Roundtable of the New York State Library Association. (First copy is free. Additional copies are available at $5.00 per copy.) June 1990.

16. **The Industry Finder.** Designed to assist individuals who have selected an occupation of interest to find the industries in which the occupation is concentrated. The report will often lead to industries that would not have been obvious choices in selecting potential employers or job opportunities. There are 68 pages of industries showing the number employed and the percent of total employment in each industry for 250 selected occupations. November 1990. Price $5.00.

B-PUBLICATIONS

244. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1989.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1989.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Communications, New York State Department of Labor, W. Averell Harriman State Office Building Campus,Albany, New York 12240.

254. **Directory of Labor Unions and Employee Organizations in New York State, 1992.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $15.00.

LABOR RESEARCH REPORTS

92-2. **A study of the Farm Labor Contractor System in New York State, July 1992.** A brief overview of the state's farm labor contractor system and its role in recruiting agricultural workers. Also included is a survey of public perceptions and attitudes, as well as suggested legislative or administrative changes which would enhance the system.

92-3. **Occupational Injuries and Illnesses Survey, State and Local Government, New York State, 1991.** An annual survey by the Labor Department of work-related fatalities, injuries and illnesses in the public sector. The survey is required by the New York Public Employee Safety and Health Act of 1980.

92-4. **New York City Residents Participating in the New York State Apprentice Training Program, Construction Trades, January 1967 - December 1991.** An overview of the relative success of the New York State Apprentice Training Program in serving New York City residents who were enrolled as construction trade apprentices. The study includes a 25-year analysis of enrollment and program termination trends by trade, sex and ethnic and age group.

93-1. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1990.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1990.

93-2. **Post-Apprenticeship Experience of Participants in New York State Apprenticeship Programs, 1990-1991.** The results of a survey of former apprentices to obtain information on the training experience, job search and subsequent employment of those who had been enrolled in an apprenticeship program. The focus of this particular study was on exploring whether any notable differences existed in the apprenticeship experience of white male or minority male or female apprenticeships.

MONTH IN REVIEW
December 1993

Civilian Labor Force

The state unemployment rate rose 0.3 of a percentage point from November 1993 to 7.5 percent in December 1993 as unemployment grew and employment declined. Compared with a year ago, the December 1993 rate was lower by 0.6 of a percentage point.

The nation's unemployment rate improved slightly in December 1993, edging downward to 6.0 percent from 6.1 percent in November. The national rate was at its lowest level for the month of December since 1990 when the rate was 5.9 percent.

Unemployment in the state increased 17,000 over the month to 628,000 in December 1993. Over the previous five years, November-to-December increases in joblessness have averaged 21,000. Since December 1992, the number of jobseekers has declined 67,000.

On an annual average basis, the state unemployment rate in 1993 was 7.7 percent, down 0.8 of a percent point from the 1992 rate. The improvement reflected a 70,000 drop in joblessness, which stood at 654,000 in 1993.

Nonfarm Employment

The nonfarm job count (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) increased by 15,100 from November 1993 to 7,826,500 in December. In the previous five years, the November-December change in nonfarm employment averaged an increase of 11,800 jobs. Nearly all of the job gains were in the New York City and Long Island areas. The nonfarm job tally was above the year-ago level for the third consecutive month.

Stronger-than-usual December recruitment in retail trade to accommodate holiday shoppers (+28,100 or +2.4 percent) outnumbered seasonal layoffs in construction (-8,900 or -3.6 percent) and cutbacks in manufacturing (-8,500 or -0.9 percent) employment. December hiring in retail trade employment was at its strongest in five years. About one half of the decline in factory jobs reflected a seasonal drop off in apparel manufacturing. The drop off in construction activity was generally milder than in previous years.

Employment was little changed in other industry divisions. The job count increased in transportation and public utilities (+2,200 or +0.6 percent), services (+2,200 or +0.1 percent), and finance, insurance and real estate (+2,000 or +0.3 percent). The number of jobs declined slightly for the public sector (-1,300 or -0.1 percent) and wholesale trade (-400 or -0.1 percent).

Compared with a year ago, nonfarm employment was higher by 30,500 or 0.4 percent. Since December 1992, employment has increased in services (+64,000 or +2.7 percent), construction (+8,500 or +3.7 percent), and retail trade (+7,800 or +0.7 percent). Since December 1992, employment has declined in manufacturing (-34,400 or -3.4 percent), wholesale trade (-5,900 or -1.4 percent), government (-4,500 or -0.3 percent), finance, insurance and real estate (-3,100 or -0.4 percent), and transportation and public utilities (-1,800 or -0.4 percent).

For all of 1993, the nonfarm job count averaged 7,705,500, down 22,900 or -0.3 percent from 1992. The 1993 job losses were concentrated in the first half of the year.

INSURED EMPLOYMENT AND PAYROLLS
FIRST QUARTER 1993

INSURED COVERAGE. Under the New York State Unemployment Insurance Law as a result of an amendment effective January 1960, an employer of individuals other than household workers becomes liable for the unemployment insurance tax if within a single calendar quarter he pays remuneration of $300 or more. As a result of an amendment effective January 1966, an employer who employs one or more household workers and pays them cash remuneration of $500 or more within a single calendar quarter becomes liable for the tax. In effect, employers of one or more workers become liable for the unemployment insurance tax on the first day of the calendar quarter in which remuneration is paid.

Most persons employed by nonprofit organizations were covered by unemployment insurance beginning January 1, 1971 as a result of "stand-by" legislation originally enacted in 1965 which became operative because of the federal amendments of 1970.

A nonprofit organization becomes liable when it makes cash payments to its employees of $1,000 or more in a calendar quarter. Effective January 1, 1972, liability also begins if the nonprofit organization employs four or more persons on each of 20 days in at least 20 different weeks during the current or preceding calendar year.

Effective January 1, 1978, the services of persons engaged in a teaching or other professional capacity at a nonprofit educational institution below the college level were covered by unemployment insurance.

Agricultural labor was also covered as of January 1, 1978. Exceptions exist for employers of fewer than 10 persons or those with a quarterly payroll of less than $20,000.

Effective with first quarter 1985 data, employees of the federal government, New York State, and local government units covered for unemployment compensation purposes are included in this series.

Certain groups continue to be excluded from coverage. Those excluded are interstate railroads, the self-employed, services of an individual employer's wife, husband or minor child and certain other small groups of workers.

Insured employment, payrolls and reporting unit data are not intended to reflect a continuous series over the years. The data only represent experience within a specific calendar period. Significant factors which affect comparability are changes in the coverage provisions of the law, such as those mentioned above, as well as employment reclassification changes. The reclassification changes are occasioned by industrial and/or geographic classification code changes. They may be economic or noneconomic. Economic code changes are made in the quarter when the product or business activity of an establishment has changes (industry code) or whenever an employer moves from one location to another in New York State (geographic code). Noneconomic code changes are made effective in the first quarter of each year. Noneconomic code changes arise from (1) structural changes in the *Standard Industrial Classification Manual*, and (2) newly disclosed information affecting either the industrial or geographic location.

Effective with the first quarter of 1989, employers with multiple worksites employing 10 or more workers in secondary locations were required to report these worksites separately. Previously, only employers with 50 or more workers at a secondary location were required to file separate multiple worksite reports.

REPORTING UNIT. An establishment, or reporting unit, is usually a single place of business, engaged in a single business activity, and operated by a single employer. Business firms operating more than one establishment, in which the sum of employment in secondary locations exceeds 10 persons, are required to submit a separate report for each unit unless the payrolls are not maintained separately. If two or more units of a single employer are in a single physical location but maintain separate payroll records and engage in distinct or separate business activities, then each unit is treated as a separate reporting unit.

EMPLOYMENT. The tables in this report include all employment covered under the New York State Unemployment Insurance Law for each of the three months in the quarter. The employment count represents the number of full-time and part-time employees earnings wages or salaries for the payroll period including the 12th of the month. Included are persons on paid vacations and on paid sick leave. Workers temporarily earning no wages because of labor-management disputes, layoffs or other reasons are not reported as employed. Persons on the payroll of more than one establishment during the same reference week are reported more than once.

TOTAL QUARTERLY PAYROLLS. Total quarterly payrolls cover all wages and salaries paid to individuals in insured employment.

INDUSTRIAL CLASSIFICATION. Data are classified in accordance with the 1987 edition of the *Standard Industrial Classification Manual* prepared by the U.S. Office of Management and Budget. This edition replaces the 1972 edition.

When a 2-digit manufacturing industry has less than 100 employees or less than three reporting units, figures are combined in "all other durable goods" or "all other nondurable goods."

The category "all other" includes agriculture, forestry and fisheries, mining and unclassified establishments.

COUNTY CLASSIFICATION. County classification of employment and payroll data is based on the physical location of the establishment. The category "statewide" which appears at the end of the county listing covers all reporting units not classified by county. Included in this category are: reporting units without a fixed location within the state, those with a significant number of employees in more than one county for which separate data are not available, and those for which county location has not yet been determined.

LABOR AREA. A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purpose of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and employment service program) is given below:

- *Albany-Schenectady-Troy.* Albany, Montgomery, Greene, Rensselaer, Saratoga and Schenectady counties.
- *Binghamton.* Broome and Tioga counties.
- *Buffalo.* Erie and Niagara counties.
- *Nassau-Suffolk.* Nassau and Suffolk counties.
- *New York City.* Bronx, Kings, New York, Queens and Richmond counties.
- *Rochester.* Livingston, Monroe, Ontario, Orleans and Wayne counties.
- *Syracuse.* Madison, Onondaga and Oswego counties.
- *Utica-Rome.* Herkimer and Oneida counties.
- *Westchester.* Westchester County.

SOURCE OF DATA. Reports submitted quarterly by employers subject to the New York State Unemployment Insurance Law.

INSURED EMPLOYMENT AND PAYROLLS IN SELECTED COUNTIES WITH EMPLOYMENT OF 100,000 OR MORE
FIRST QUARTER 1993

Data for 9 of the 10 counties in New York State in which average insured employment exceeds 100,000 or more are presented in the following tables. Westchester County is not included in this section as the industry detail for this county was shown in Table 4 in the preceding tables.

In order to safeguard the confidential nature of individual employer reports, data on some industries in some counties were consolidated into statistically valid groupings.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 54,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are

normally subject to revision annually. Current estimates are based on the March 1992 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Nonfarm Employment. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Reference Week of the Month. Employment, payrolls, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight of individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Production-Worker Averages. Average hours and earnings data are derived from reports of payrolls and hours for production and related workers in manufacturing and mining, construction workers in construction, and nonsupervisory employees in private service-producing industries.

Production and related workers include working supervisors and all nonsupervisory workers (including group leaders and trainees) engaged in fabricating, processing, assembling, inspecting, receiving, storing, handling, packing, warehousing, shipping, trucking, hauling, maintenance, repair, janitorial, guard services, product development, auxiliary production for plant's own use (e.g., power plant), recordkeeping, and other services closely associated with the above production operations.

Construction workers include the following employees in the construction division: Working supervisors, qualified craft workers, mechanics, apprentices, helpers, laborers, etc., engaged in new work, alterations, demolition, repair, maintenance, etc., whether working at the site of construction or working in shops or yards at jobs (such as precutting and preassembling) ordinarily performed by members of the construction trades.

Nonsupervisory employees include employees (not above the working supervisory level) such as office and clerical workers, repairers, salespersons, operators, drivers, physicians, lawyers, accountants, nurses, social workers, research aides, teachers, drafters, photographers, beauticians, musicians, restaurant workers, custodial workers, attendants, line installers and repairers, laborers, janitors, guards, and other employees at similar occupational levels whose services are closely associated with those of the employees listed.

--**Average Weekly Hours.** Represents total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--**Average Hourly Earnings.** Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--**Average Weekly Earnings.** Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

--**Average Weekly Overtime Hours.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

METROPOLITAN STATISTICAL AREA

A metropolitan statistical area (MSA) is defined according to a set of detailed standards prepared by the Federal Committee on MSAs. Under these standards, which were revised in 1980, areas are designated as an MSA in one of two ways: If there is a city of at least 50,000 population, or an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. In New York State, MSAs are defined in terms of entire counties. In addition to the county containing the main city, an MSA also includes additional counties having strong economic and social ties to the central county.

Most MSA definitions are not subject to change until after the next national census. However, supplemental announcements of a few new MSAs may be issued in the spring of each year, generally because additional cities have reached the 50,000 level according to official population estimates.

If an area has more than 1 million population and meets certain other specified requirements, it will now be termed a Consolidated Metropolitan Statistical Area (CMSA), consisting of major components recognized as Primary Metropolitan Statistical Areas (PMSAs).

A number of areas in the state do not meet the criteria for recognition as an MSA but estimates are published for them. These areas are called Labor Market Areas (LMAs).

The geographic composition of the areas is given below.

Albany-Schenectady-Troy MSA. Albany, Montgomery, Greene, Rensselaer, Saratoga and Schenectady counties.
Binghamton MSA. Broome and Tioga counties.
Buffalo-Niagara Falls CMSA. Erie and Niagara counties.
Buffalo PMSA. Erie County.
Elmira MSA. Chemung County.
Glens Falls MSA. Warren and Washington counties.
Nassau-Suffolk PMSA. Nassau and Suffolk counties.
New York City. Bronx, Kings, New York, Queens and Richmond counties.
New York Combined Area. Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties.
New York PMSA. New York City and Putnam, Rockland and Westchester counties.
Niagara Falls PMSA. Niagara County.
Orange County PMSA. Orange County.
Poughkeepsie MSA. Dutchess County.
Putnam LMA. Putnam County.
Rochester MSA. Livingston, Monroe, Ontario, Orleans and Wayne Counties.
Rockland LMA. Rockland County.
Syracuse MSA. Madison, Onondaga and Oswego counties.
Utica-Rome MSA. Herkimer and Oneida counties.
Westchester LMA. Westchester County.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1987 edition of the *Standard Industrial Classification (SIC) Manual* prepared by the U.S. Office of Management and Budget. For space requirements on the statistical tables, the formal SIC title for most of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1987 edition of the *SIC Manual-List of short SIC titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to total because of rounding.

Revisions. Revised figures are preceded by an "r" when first published.

KEY

Blank or-	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

Recurrent Report 8 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

1. **Employment in New York State (formerly Employment Trends).** Monthly for New York State. This newsletter provides an up-to-date summary of labor research issues and trends in New York State and selected regions. Current unemployment rates and area conditions are also reviewed.

2. **Labor Area Summary.** Monthly Statistical Report. This statistical report for all labor areas in the state shows nonagricultural wage and salary employment for the local area and civilian labor force data for the state, major labor areas and all counties.

3. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates.

4. **Collective Bargaining Settlements in New York State.** Quarterly. Summarizes changes in collective bargaining agreements covering wages that affect 250 or more workers. Covers wages and fringe benefits for agreements that affect 1,000 or more workers. Annual subscription **$60.** Individual issues **$15** each.

5. **Calendar of Collective Bargaining, New York State.** Annual. This report lists all agreements covering 500 or more workers known to the Division of Research that expire or are subject to a wage reopening in the coming year. The report is organized by month of expiration or reopening and, within each month, by industry.

6. **Comparison of Key Unemployment Insurance Statistics (State by State).** Semiannual. Graphically compares New York State's unemployment insurance (UI) program with those of other states. Charts use key statistics such as average unemployment contributions per covered employer, average weekly benefit amounts and average weekly wage of UI covered employment.

7. **Tomorrow's Jobs - Tomorrow's Workers**. Annual. Provides information on economic conditions and the occupational supply and demand situation by geographic region. The reports are designed to assist human resource planners, educators and training providers to help identify training needs in each region. They include a list of demand occupations focusing on specific characteristics of occupations with reasonable hiring expectations (See page viii for map of regions).

8. **Occupational Outlook, 1993-1997.** Projects the demand for workers in various jobs in New York and its geographic regions. The report is based on occupational employment statistics surveys which examine occupational distributions on a three-year cycle. The surveys involve a statistical sample of industries throughout the state to obtain their occupational staffing patterns. See page viii for map of regions. (First copy is free. Additional copies are available at $5.00 per copy.)

New

SPECIAL REPORTS

Special Reports 12, 13, 15 and/or 16 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

9. **Occupational Briefs.** Supply career information for specific occupations. These booklets describe job duties, earnings, training requirements, employment outlook, locations of jobs, physical demands and working conditions, etc. Available for Secretary and Career Counselor.

10. **Occupational Guides.** Similar to Occupational Briefs. Guides have been developed for 128 occupations. Designed to provide the user with a better understanding of various occupations in a quick-read format and to assist those who may be making career choices or changes.

New

11. **Affirmative Action Data - 1990 Census.** This booklet provides data from the 1990 Census for New York State by standard metropolitan statistical area (SMSAs) and counties for use in preparing or assessing affirmative actions plans. Tables show total, female and minority counts and percentages of population, civilian labor force measures and occupational groups. February 1993.

12. **The Jobseeker.** An 84-page guide designed primarily to assist young people entering the job market. Contains sections on the job market and labor force, kinds of employers, kinds of occupations, how to choose an occupation, chances of finding a job, what to do to find a job, how to prepare a resume, how to complete an employment application, how to do well at a job interview. Also contains occupational profiles on 152 occupations of interest to youth, with information on each regarding: number of employed, where found, job outlook, education needed, personal characteristics, and earnings. (First copy is free. Additional copies are available at $1.00 per copy.) October 1989.

13. **Occupations Licensed or Certified by New York State.** This publication contains licensing requirements for 65 occupations (training, tests and fees) as well as information on employment outlook, earnings, and working conditions for these occupations. The report also includes a list of apprenticeable occupations. March 1990. Price $10.00.

14. **Directory of Labor Market Information.** Includes brief descriptions of recurring New York State Labor Department publications and data series that refer directly to the labor market as well as a guide to other sources of labor market information. Lists local labor market analysts to contact for additional information . 52 pages.

15. **Labor Force 2000.** Contains civilian labor force projections for New York State and its economic development regions for the year 2000. Includes conservative, moderate and expansive scenarios for New York State. This report was chosen for the 1990 Notable Documents Award by the Government Documents Roundtable of the New York State Library Association. (First copy is free. Additional copies are available at $5.00 per copy.) June 1990.

16. **The Industry Finder.** Designed to assist individuals who have selected an occupation of interest to find the industries in which the occupation is concentrated. The report will often lead to industries that would not have been obvious choices in selecting potential employers or job opportunities. There are 68 pages of industries showing the number employed and the percent of total employment in each industry for 250 selected occupations. November 1990. Price $5.00.

B-PUBLICATIONS

244. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1989.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1989.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Communications, New York State Department of Labor, W. Averell Harriman State Office Building Campus,Albany, New York 12240.

254. **Directory of Labor Unions and Employee Organizations in New York State, 1992.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price **$15.00.**

LABOR RESEARCH REPORTS

92-2. **A study of the Farm Labor Contractor System in New York State, July 1992.** A brief overview of the state's farm labor contractor system and its role in recruiting agricultural workers. Also included is a survey of public perceptions and attitudes, as well as suggested legislative or administrative changes which would enhance the system.

92-3. **Occupational Injuries and Illnesses Survey, State and Local Government, New York State, 1991.** An annual survey by the Labor Department of work-related fatalities, injuries and illnesses in the public sector. The survey is required by the New York Public Employee Safety and Health Act of 1980.

92-4. **New York City Residents Participating in the New York State Apprentice Training Program, Construction Trades, January 1967 - December 1991.** An overview of the relative success of the New York State Apprentice Training Program in serving New York City residents who were enrolled as construction trade apprentices. The study includes a 25-year analysis of enrollment and program termination trends by trade, sex and ethnic and age group.

93-1. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1990.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1990.

93-2. **Post-Apprenticeship Experience of Participants in New York State Apprenticeship Programs, 1990-1991.** The results of a survey of former apprentices to obtain information on the training experience, job search and subsequent employment of those who had been enrolled in an apprenticeship program. The focus of this particular study was on exploring whether any notable differences existed in the apprenticeship experience of white male or minority male or female apprenticeships.
